

# Rubber-stamped Wedding card

BY KAREN GRANT

Combine rubber stamping with embellishing for a one-of-a-kind wedding card (perfect for a fun couple).

## Instructions:

1. With the black ink pad, stamp "Happy Wedding Day" randomly on the silver cardstock. You may want to pre-stamp onto a blank sheet of paper to remove some of the black ink before stamping onto your silver. That will make this background more subtle.
2. On your white cardstock, stamp a male figure and a female figure using Crayon Kids stamps (or something similar). Color the male's pants black. Cut out around each figure, then adhere to your silver card using double-sided tape cut from your roll of Treasure Tape™.
3. Cut pieces of Treasure Tape™ to fit over these areas only: the male's shirt area, pants, and shoes. These can be separate pieces of tape, trimmed to fit within the stamped areas.
4. Cut pieces of Treasure Tap™ in the same way to cover these areas on the female figure: body/dress, shoes, and cut a piece to resemble a veil.
5. Working the male first, remove the red liner to expose the sticky tape. Outline the shirt with 1/8" Ribbon 3231 Moonstone. Outline the pants with Black Facets. Attach black Vintage Finds or buttons on shirt and shoes as shown in the photo.
6. On the female, remove the red liner to expose sticky tape. Outline dress and shoes in 1/8" Ribbon 3231. Adhere white/pearl Vintage Finds or buttons on veil, dress, and shoes as shown in photo.
7. Place card in a shallow pan and cover with Diamond Beadlets®. Make sure all remaining sticky areas are covered with the clear beads.
8. From your Treasure Tape™ cut out three small heart shapes. Adhere heart-shaped buttons or Vintage Finds. If any sticky tape is still exposed, cover with Diamond Beadlets®.
